

Json::CharReader::Factory

```
classDiagram
    class JsonCharReaderBuilder["Json::CharReaderBuilder"]
    class JsonCharReaderFactory["Json::CharReader::Factory"]
    JsonCharReaderBuilder --|> JsonCharReaderFactory
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Json::CharReader::Factory'. Below it are two boxes, both labeled 'Json::CharReaderBuilder'. A horizontal line connects the two bottom boxes, and a vertical line with an upward-pointing arrow connects the center of this line to the bottom of the top box, indicating that both bottom classes inherit from the top class.
